---

### Career Objective :

I am a coding enthusiast with strong knowledge of C, Java, **Data Structures and Algorithms**, skilled in SQL and Database Management Systems(DBMS) along with some basic coding skills in C++, also having my hands on practice in **Web Development** in both front-end and back-end. Along, with these developmental skills I am learning Machine Learning as AI is the future of our generation. I am seeking an opportunity to implement my programming and development skills in a practical application which will give me exposure to the actual design and execution process of industry. I would love to associate with such an organization where I can utilize my skills and gain further experience while enhancing the company's productivity and reputation.

Apart from these, I strongly believe in Management and Leadership skills and I possess an effective communication skill set that would enhance my client's interaction.

---
